

STAGERIDER **STU – Switzerland**

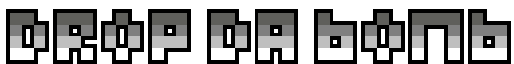

needed on stage:

- 1 available 230V / 50Hz Schuko (European) or Swiss socket for electricity
- 2 symmetric wires with XLR or jack plugs (to connect our stage mixer to your DI-Box/PA)
- 2 monitors – good enough to 'feel' the music during the act
- a high/stable enough table (at least 1m, preferably 1.2m) with a min. of 0.8m x 1.2m space on it
- depending on the brightness on stage, a small light may be required

if everything mentioned above is ready, building up and sound check usually takes 45min max.

backstage:

beverage, snacks, shower/toilet and restroom (if available)
